Experience

1248 Technologies (CoFounder)

Sep 2022 - Present

- Worked on the ONDC platform which is a GOI project.
- (Open Source) Worked on the beckn protocol which works behind ONDC. Created UI components in ReactJs based on Figma designs. Created backend API endpoints in NestJS.
- Wrote unit test cases.

TechStack - TypeScript, **ReactJs, NodeJS**, MongoDB

ConsultIT

Jun 2020 - Aug 2022

- Worked on a video-sharing mobile application and optimized the loading time.
- Worked on an aptitude test application. Used Redis to not make unnecessary db calls to MongoDB and after completion of the whole exercise store data in MongoDB.
- Deployed application to the production server, using Google Cloud Platform and Google Play Console.

TechStack–**Flutter**, **ReactJs**, TypeScript, **NodeJs**, MongoDB, Redis, firebase, GCP

Block8

May 2018 - May 2019

- Worked on a real-time trading application.
- Created POC for a blockchain-typescript application. Wrote the unit test cases for the entire application.

TechStack - Android Studio, **ReactJs**, MeteorJs
